

2008-2009 School Improvement Plan

During the year 2008-2009 InTech will be offering new resources to help students meet Utah High School Graduation and College Entrance Requirements. We will focus on offering Health/PE, foreign language, and helping at-risk math students learn the concepts they need to succeed in math. Our goal is to increase our scores in CRT tests in Algebra I from the rate of 60% (2007) at a level 3 or 4 mastery level to 80%(2009) at a level 3 or 4 mastery level.
